## **THE ROAD** AHEAD

MaineSaves has a new investment fund menu. Now you can choose your investments based on how comfortable you are with making investment decisions. You can let the pros take the wheel by using target date funds, create your own investment mix with core funds, or fully customize your mix with a self-directed account. Our driver has chosen to save with a target date fund, which is why the road ahead looks like it does. But your route is up to you!
